

**Kok Xing Yi**

**Peiyong Primary School**

**Valedictorian Speech**

Good morning to all distinguished teachers and parents, and a big hello to our fellow friends. First and foremost, I would like to thank everyone present for taking your precious time out to attend today's prize presentation ceremony and a warm welcome to all of you too. I am Kok Xing Yi from Peiyong Primary School.

Time really flies, 6 years of my life in Peiyong just passed in the blink of an eye. I am now at the beginning of a new chapter of my life. Everything is going to be different, just like how it was when I was 7 years old, entering my Primary school as a Primary 1 student.

Now, I would like to thank all the people who have been supporting and encouraging me. To be honest, I failed my Mathematics once when I was in Primary 5. I then began to worry about my academics results, which I never did in the past. Luckily, my cousin, Huiling, offered help and tutored me. I soon achieved an A\* for my Mathematics during this year's preliminary examinations, so I would really like to take this opportunity to thank her.

Here's also a special thank you to Mr Ong, who is a very passionate and knowledgeable teacher that makes the tuition classes interesting, interactive, fun and enjoyable. Last but not least, I would like to say this to all the teachers who have taught me, you sowed a seed and grew a tree of knowledge in me, thank you for everything.

Congratulations to all prize winners today! Thank you for your kind attention!
